# AFCON 2025 WINNER PREDICTION DASHBOARD

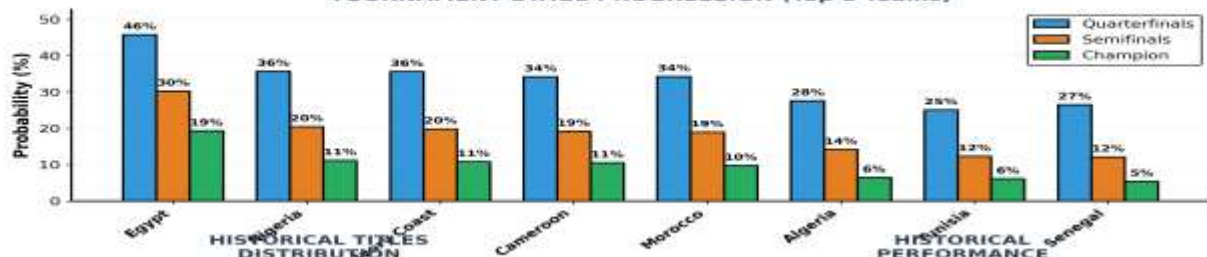

## TOP 10 TEAMS BY WIN PROBABILITY

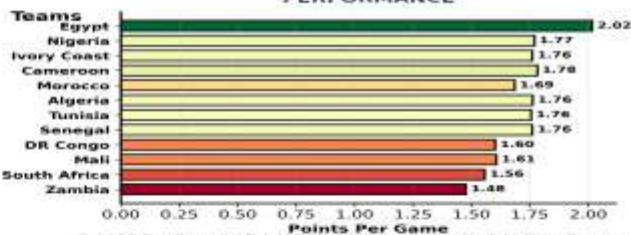

## TOP 5 TEAMS - KEY METRICS

| Team        | Win Probability | Strength Score | AFCON Titles | Tournament Appearances | Points Per Game |
|-------------|-----------------|----------------|--------------|------------------------|-----------------|
| Egypt       | 19.3%           | 77.2           | 7            | 26                     | 2.02            |
| Nigeria     | 11.2%           | 59.8           | 3            | 19                     | 1.77            |
| Ivory Coast | 10.8%           | 60.0           | 3            | 24                     | 1.76            |
| Cameroon    | 10.5%           | 60.1           | 5            | 21                     | 1.78            |
| Morocco     | 9.8%            | 62.9           | 1            | 18                     | 1.69            |

## TOURNAMENT STAGE PROGRESSION (Top 8 Teams)

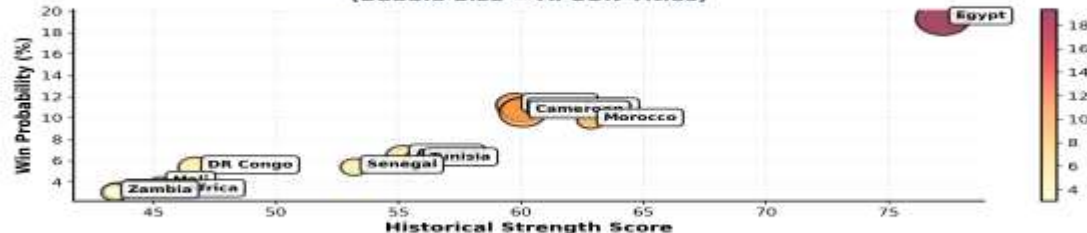

## HISTORICAL TITLES DISTRIBUTION

© 2025 Dr. Victor Prefa | AFCON 2025 Prediction Model | Data Sources: CAF, Wikipedia, FIFA | Methodology: Monte Carlo Simulation, Poisson Regression, Goal Models

## STRENGTH vs WIN PROBABILITY (Bubble Size = AFCON Titles)

## MODEL OVERVIEW

Simulations: 10,000 complete tournaments  
Historical Data: 1957-2025 (65+ years)  
Teams Analyzed: 24 (AFCON 2025)  
Features Used: 22 performance metrics

## TOP PREDICTION

Champion: EGYPT [19.3%]  
Win Probability: 19.3%  
Strength Score: 77.22 / 100

## KEY FINDINGS

- ✓ Egypt leads with 7 AFCON titles
- ✓ Top 5 teams within 10% probability
- ✓ Morocco (host) ranks 5th at 9.8%
- ✓ Nigeria & Ivory Coast close at ~11%

## METHODOLOGY

- Poisson goal distribution models
- Weighted composite strength scoring
- Monte Carlo tournament simulation
- Group stage → Knockout progression

## SLEEPER PICKS

Algeria (6.4%) - 2 titles, strong recent form  
Senegal (5.4%) - Defending champions (2021)  
DR Congo (5.4%) - 2 titles, unpredictable

## LIMITATIONS

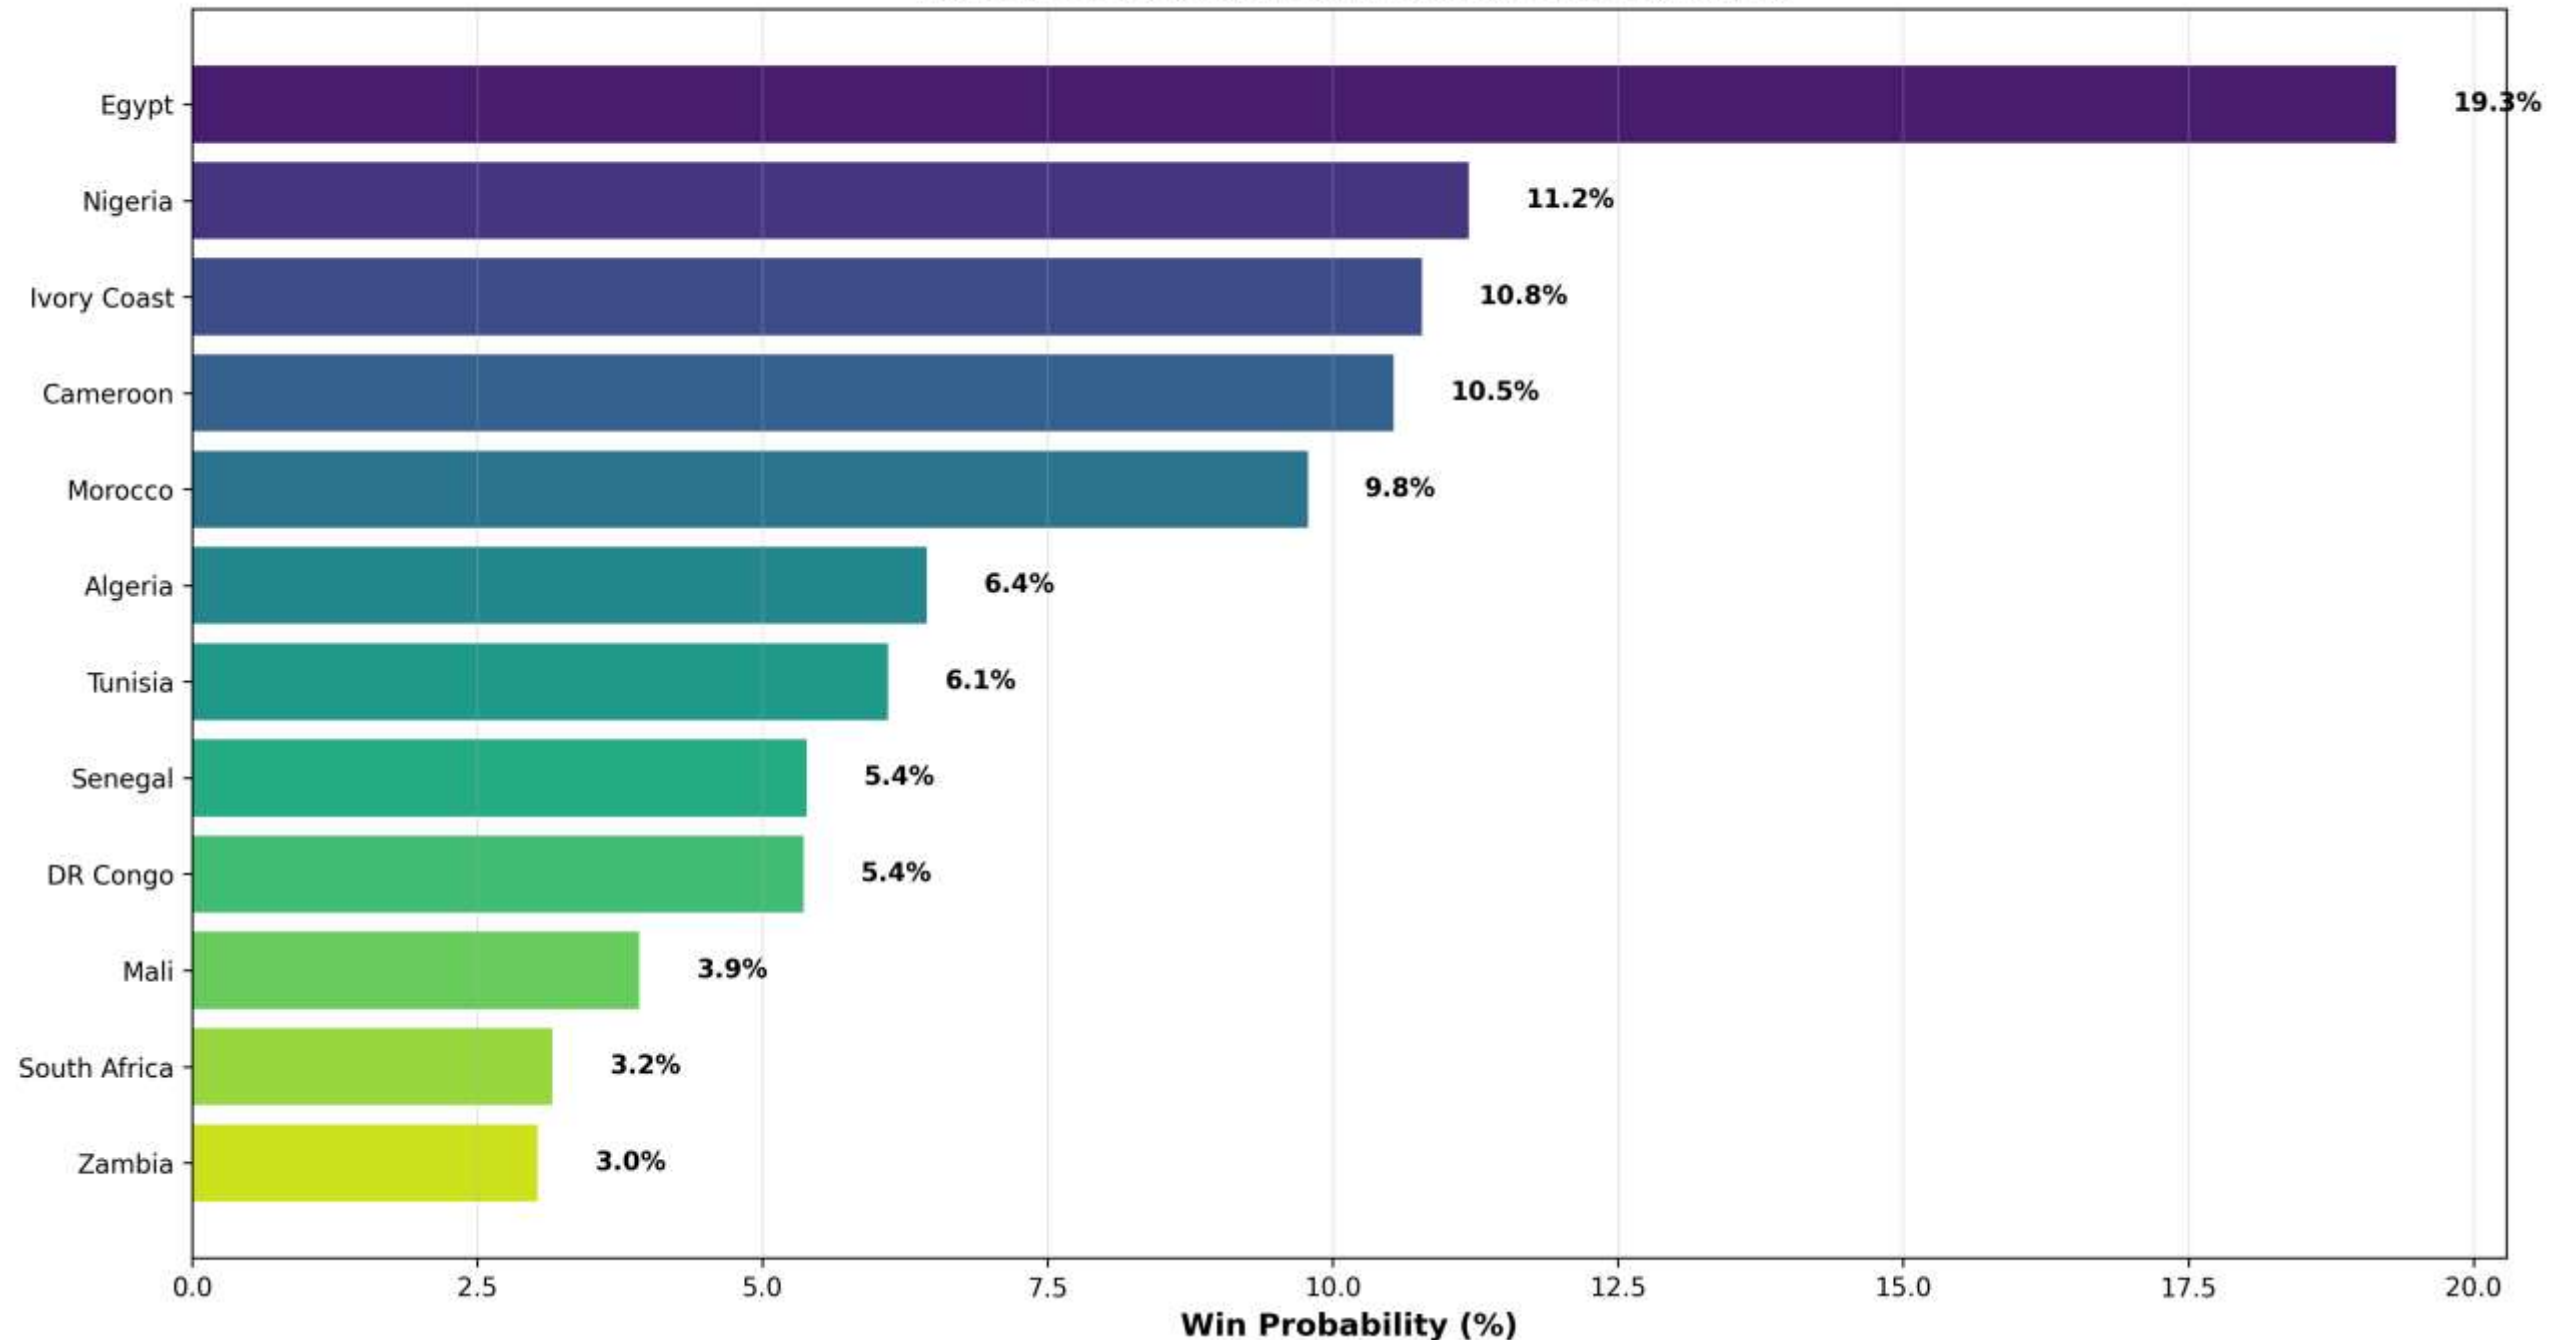

- ⚠ No player-level statistics included
- ⚠ Knockout stage variance is high
- ⚠ Injuries & tactical changes not modeled
- ⚠ Probabilistic, not deterministic

# PREDICTED WINNER: EGYPT (19.3% probability)

## Top 10 Predictions

|  | Country     | Win Percentage | Reach Quarter | Reach Semi Final |
|----------------------------------------------------------------------------------|-------------|----------------|---------------|------------------|
| 1                                                                                | Egypt       | 19.3%          | 45.8%         | 30.3%            |
| 2                                                                                | Nigeria     | 11.2%          | 35.7%         | 20.5%            |
| 3                                                                                | Ivory Coast | 10.8%          | 35.6%         | 19.8%            |
| 4                                                                                | Cameroon    | 10.5%          | 34.2%         | 19.8%            |
| 5                                                                                | Morocco     | 9.8%           | 34.3%         | 19.2%            |
| 6                                                                                | Algeria     | 6.4%           | 27.6%         | 14.2%            |
| 7                                                                                | Tunisia     | 6.1%           | 25.1%         | 12.3%            |

# AFCON 2025 Winner Prediction (Based on 10,000 Monte Carlo Simulations)

# •The Prestigious Cup

---

# Why Egypt?

- Unmatched Historical Dominance
- 7 AFCON titles
- (most all-time)
- 26 tournament appearances
- (most participations)
- 111 matches played
- (most experience)
- 2.018 points per game
- (highest efficiency)

# Perfect Current Form

Group  
Stage  
2025:

2 Wins, 0  
Draws, 0  
Losses-

Goals: 3  
scored, 1  
conceded

First team  
to qualify  
for Round  
of 16

# Key Insights

🎯 The "Big 5" are Remarkably Close Teams ranked 2-5 (Nigeria, Ivory Coast, Cameroon, Morocco) have win probabilities within 1.4 percentage points (9.8% - 11.2%).

The above suggests knockout stages will be highly competitive and unpredictable.

🏠 Host Advantage is Real But Not Dominant

Morocco ranks 5th despite hosting because:- Only 1 historical AFCON title (1976) - Lower points-per-game than top 4

However: Host nations win ~47% historically

# Underdogs to Watch

## ★ Dark Horses to Watch

Algeria (6.4%): 2 titles, strong recent form

Senegal (5.4%): Defending champions (2021)

DR Congo

(5.4%): 2 titles, unpredictable in knockouts

# Methodology

Data Sources- Historical AFCON data (1957-2025): 65+ years- Current tournament results: Live group stage data- Tournament structure: 24 teams, 6 groups, knockout format

Model Features  
(22 total)

1. Performance  
Metrics: Wins,  
draws, losses,  
goals, points  
per game

2. Tournament  
Pedigree:  
Titles,  
appearances,  
qualification  
success<sup>3</sup>.

Current Form:  
2025 group stage  
results<sup>4</sup>.

Contextual  
Factors: Host  
advantage,  
defensive  
solidity

# StrengthIndex x Formula

Goal Diff + 15% × Clean  
Sheets + 10% ×  
Qual Success + 10% ×  
Experience + 10% × Host  
Bonus

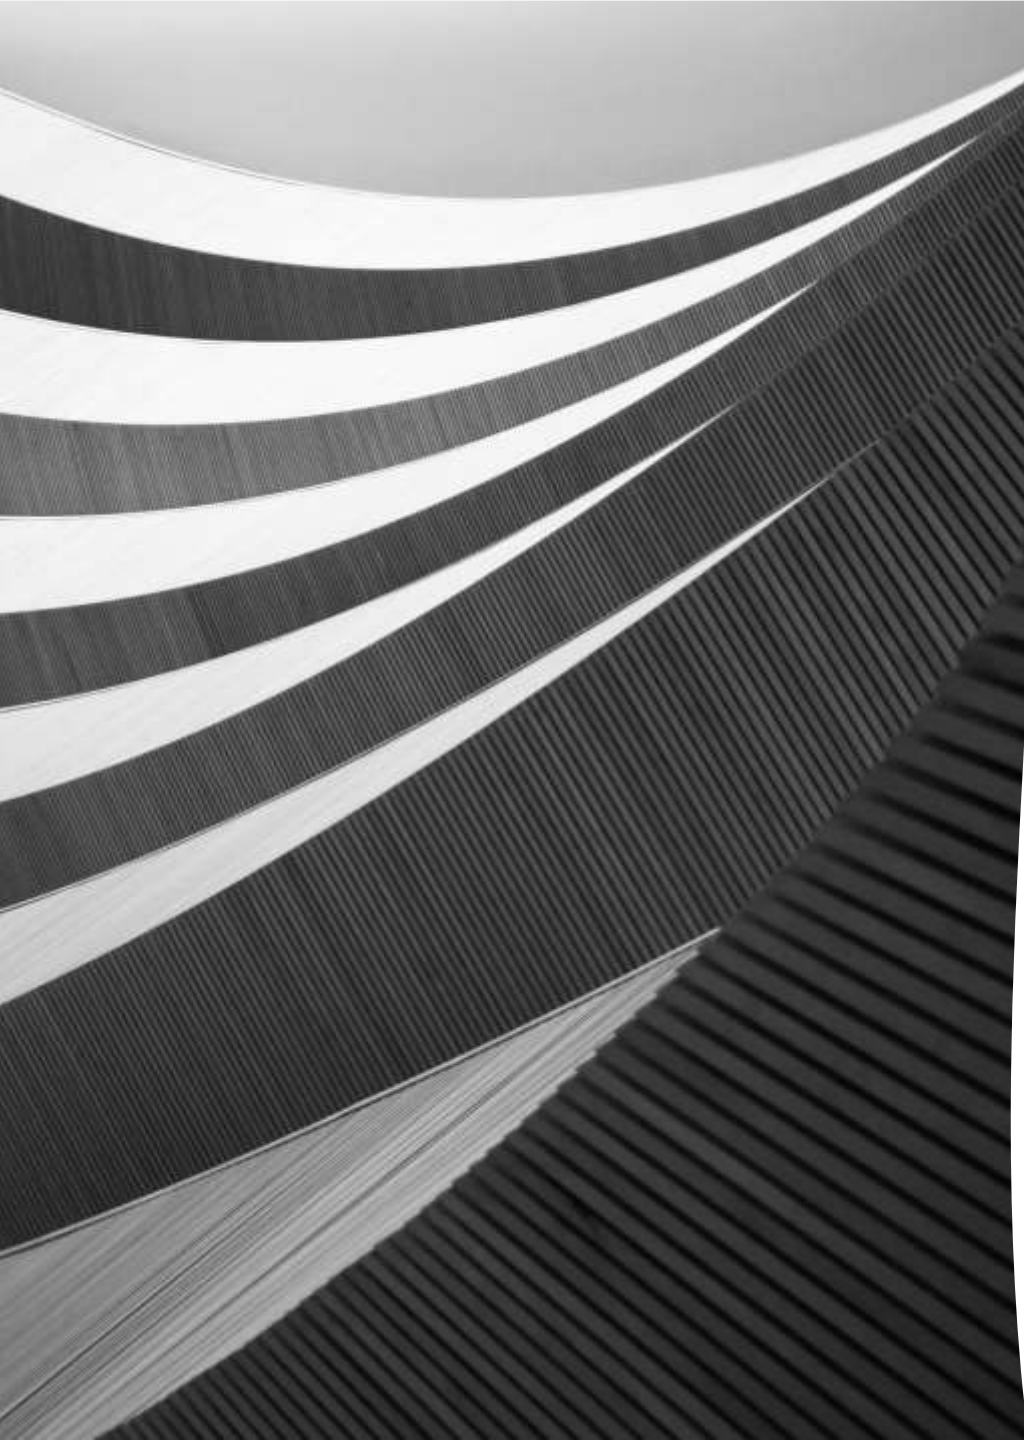

Simulation Engine: Poisson  
distribution for goal modelling:  
10,000 complete tournaments  
simulated- Accounts for group  
stage → R16 → QF → SF → Final-  
Penalty shootouts modelled  
probabilistically

Model Validation ✓  
Strengths- 65+ years of  
comprehensive historical  
data

interpretable  
methodology- 10,000  
simulations ensure  
statistical robustness →→

Limitations: Cannot predict injuries, tactical changes, or referee decisions

Does not include player-level statistics-  
Knockout football inherently high-variance-  
Simplified bracket structure

Clinical-Data Science Parallel As a  
physician and data scientist,

I recognize strong parallels: | Clinical Medicine  
| Football Analytics | Patient history | Team  
historical performance || Current vital signs |  
Current tournament form || APACHE/SOFA scores |  
Strength index || Mortality probability | Win  
probability || Evidence-based | Data-driven ||  
Never certain | Never certain |

# Conclusion

Bottom Line

Egypt is the statistical favorite, but the tournament remains wide open.

The top 5 teams are separated by less than 10 percentage points. In knockout football, anything can happen.

This model provides evidence-based guidance, not prophecy.

May the best team win.

# Project Deliverables

- ✓ Complete Python codebase (450+ lines)
- ✓ Historical dataset (24 teams × 22 features)
- ✓ Monte Carlo simulation engine
- ✓ Professional visualizations
- ✓ Comprehensive technical documentation
- ✓ GitHub-ready repository structure
- ✓ LinkedIn publishing templates   \*\*Status:\*\* Ready for portfolio/publication
- ✓\*Connect: LinkedIn: [Dr. Victor Prefa]
- GitHub: [<https://github.com/23396784/-Project-AFCON-2025-Winner-Prediction.com/victor-prefa/afcon-2025-prediction>]
